Summary

Full-stack developer specializing in React, Node.js, and Python, with hands-on experience building AI-powered web applications and scalable systems. Proven ability to design responsive interfaces, develop RESTful APIs, and integrate machine learning models for real-world problem solving. Focused on writing clean, maintainable code and continuously improving through practical projects.

Skills

Languages:	JavaScript, Python, Java, C++
Frontend:	React.js, HTML5, CSS3
Backend:	Node.js, Express.js, FastAPI
Databases:	MongoDB, MySQL
Tools & Platforms:	Git, GitHub, Vercel, Anaconda
Core Concepts:	Data Structures & Algorithms, OOP, REST APIs, Responsive Design

Projects

AI-Park – AI-Powered Smart Parking System Python, React, Node.js, Machine Learning GitHub: github.com/Saquib107/ai-park - Developed an AI-based parking management system to predict real-time slot availability using machine learning models. - Built an interactive React dashboard to visualize parking occupancy and system insights. - Designed and implemented RESTful APIs using Node.js for seamless frontend-backend communication. - Implemented predictive logic to estimate peak usage times, improving user decision-making efficiency. - Structured the application with a modular and scalable architecture for future expansion.	2025
Decision-IQ – AI Decision Support System JavaScript, Python, React, Node.js Live: decision-iq-three.vercel.app GitHub: github.com/Saquib107 - Built a full-stack web application that provides data-driven decision recommendations based on user-defined criteria. - Developed a responsive React frontend with intuitive user input and result visualization. - Integrated a Python-based reasoning engine with Node.js APIs for real-time processing. - Designed a clean client-server architecture ensuring scalability and maintainability. - Deployed the application on Vercel with optimized performance and fast load times.	2024 – 2025
React Vite Portfolio – Personal Portfolio Website React, JavaScript, Vite Live: react-vite-portfolio-xi.vercel.app GitHub: github.com/Saquib107/react-vite-portfolio - Built a modern developer portfolio using React + Vite for fast performance and efficient builds. - Designed modular UI components (Hero, Projects, Skills, Contact) for reusability and scalability. - Implemented responsive design principles for seamless experience across devices. - Optimized development workflow using Hot Module Replacement (HMR).	2024 – 2025

Certifications & Achievements

Bharatiya Antariksh Hackathon 2025 – ISRO Hack2Skill – Selected participant for India's national-level space innovation hackathon powered by ISRO.	2025
ByteVerse 7.0 Hackathon NIT Patna – Participated as part of Team Fusion Coders in a competitive national-level coding hackathon.	2025
Python Programming Fundamentals Microsoft / Coursera – Completed certified training in Python programming authorized by Microsoft via Coursera.	Jun 2025
React Portfolio Bootcamp DevTown x Microsoft Student Chapter – MSIT – Completed hands-on training and project development in React.	May 2025

Education

Bachelor of Technology (B.Tech) in Computer Science Gandhi Engineering College, Bhubaneswar	Expected: 2028
